## SMART DRIVE installation manual

Simple procedure to install a HDD into SMART DRIVE. Even bigginers can easily.

After the installation, just amount to 5" Inside-Bay of PC Enclosure as you do for DVD etc.

### contents

1. SMART DRIVE
2. Cables ( for SATA HDD & for ATA Powe )
3. Screw ( for install to PC CASE )

### Installation

#### [step 1](#)

Take the 6 screws out from the bottom side to remove the top-cover and open it.

#### [step 2](#)

Take the contents (cables) out from the Enclosure.

#### [step 3](#)

Make sure the cables are all the way seated properly.

#### [step 5](#)

Suppress the top-cover strong and tighten the 6 screws.

#### [step 6](#)

Perfect. Then mount SMART DRIVE to the 5.25" bay of the PC with attached screws.

[step 4](#)

Put your HDD into SMART DRIVE properly. Then you will see that the connectors are pressing SMART DRIVE's shock-absorber as on the picture "step 6", but it is correct.
